Workshop

How Research Institutions and Libraries can help deliver the European Open Science Cloud

Valentino Cavalli, LIBER
Engage with libraries/institutions as enabler of the EOSC – roles and recommendations on some key aspects: data stewardship, FAIRness of research outputs, incentives

— input to follow up workshop of intermediaries and funders 3 July 2018 at LIBER conference in Lille
Open Science

www.eoscpilot.eu

The European Open Science Cloud for Research pilot project is funded by the European Commission, DG Research & Innovation under contract no. 739563
"We must create infrastructure. Europe's final transition must be one from fragmented datasets to an integrated European Open Science Cloud. By 2020, we want all European researchers to be able to deposit, access and analyse European scientific data through a European Open Science Cloud"
Commissioner Carlos Moedas, Amsterdam, 4 April 2016
Aims of the EOSC

- provide all EU researchers with a trusted virtual environment with free, open and seamless services for data storage, management, analysis, sharing, and re-use, across disciplines.
- integrate and consolidate horizontal e-infrastructures.
- federate existing and emerging thematic data infrastructures and scientific clouds, effectively bridging today's fragmentation and ad-hoc solutions.
- add value (scale, data-driven science, inter-disciplinarity, data to knowledge to innovation) and leverage current & past infrastructure investment.

www.eoscpilot.eu
EOSCpilot and EOSChub

- EOSCpilot – to identify stakeholders, define Governance Framework, Policy issues, Pilot architecture and services, Interoperability, identify skills/competency gaps.

- EOSC-hub – to implement the EOSC by building an integration and management system to provide researchers with data and services.
Housekeeping

- Presentations to set the scene
- Coffee/tea break
- Split into groups – role playing – discuss policy recommendations

- We would like you to be aware that plan to take some pictures and videos of this workshop and use them for communication on social media.
- We are looking for three-four volunteers who we can interview – asking one question – during the coffee/tea break.
