

Progressing Machine Actionable Data Management Plans in DMPRoadmap, RDA 20th Plenary co-located event, 20 March 2023

Discussion Topics

Room 1: Extending vocabulary of maDMP standard to accommodate (e.g.) NII requirements

Room 2: Extensions more generally – such as those needed by UC3 developments

Room 3: Do we focus on harvesting PIDS from elsewhere, pushing PIDS elsewhere, or making machine-actionability happen within the DMP system?

Room 4: For any type of machine-actionable element – do the people entering the information benefit from it being there? If not, why should they do it?
