“Effective digital stewardship is vital to maintaining the nation’s cultural heritage, scientific evidence base, and the public records necessary for understanding and evaluating government actions.”

Authored by dozens of experts and hundreds of institutions of the National Digital Stewardship Alliance, convened through the Library of Congress, the Agenda provides funders and decision-makers with insight into emerging technological trends, gaps in digital stewardship capacity, and key areas for development.

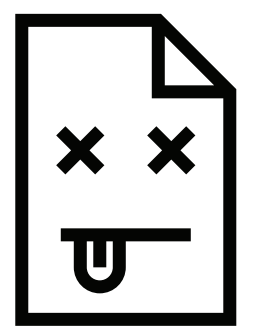

The Agenda outlines challenges and opportunities related to digital preservation activities in four broad areas.

Research Priorities

- ▶ Preservation at Scale
- ▶ Applied Research for Cost & Audit Modeling
- ▶ Policy Research on Trust Frameworks

Technical Infrastructure Development

- ▶ File Format Action Plans
- ▶ Integration of Digital Forensics Tools
- ▶ Ensuring Content Integrity
- ▶ Storage Architectures
