

THE DATA CURATION PROFILE TOOLKIT: A BRIEF INTRODUCTION

Jake Carlson

Senior Associate Librarian /
Research Data Services Manager
University of Michigan

D. Scott Brandt

Professor of Library Science /
Data Services Specialist
Purdue University

Useful for gathering:

- Information about a particular data set
- What a researcher is doing to manage / curate the data set
- What a research would like to do with the data.

<http://datacurationprofiles.org>

Characteristics:

- Tells “the story” of the data from the perspective of the researcher
- Interview Based
- Focused on a specific data set – depth over breadth
- Meant to be “discipline neutral” and widely applicable to different types of data
- Modular – allows for flexibility and tailoring to specific situations and uses

A **Data Curation Profile** is a resource for Library and Information Science professionals, Archivists, IT professionals, Data Managers, and others who want information about the specific data generated and used in research areas and sub-disciplines that may be published, shared, and preserved for re-use. Data Curation Profiles capture requirements for a specific data set generated by a single scientist or lab, based on their reported their needs and preferences for the data. More information about the Data Curation Profiles Project is available at <http://datacurationprofiles.org>

The **Data Curation Profiles Directory** provides a stable, citable home for completed Data Curation Profiles. Each completed profile is subjected to review before being formatted, published with a DOI, and distributed through the information supply chain. More information about this process can be found in the "About" section of this site.
