

Collaboration for Developing an Institutional Curation Lifecycle Model

Hea Lim Rhee

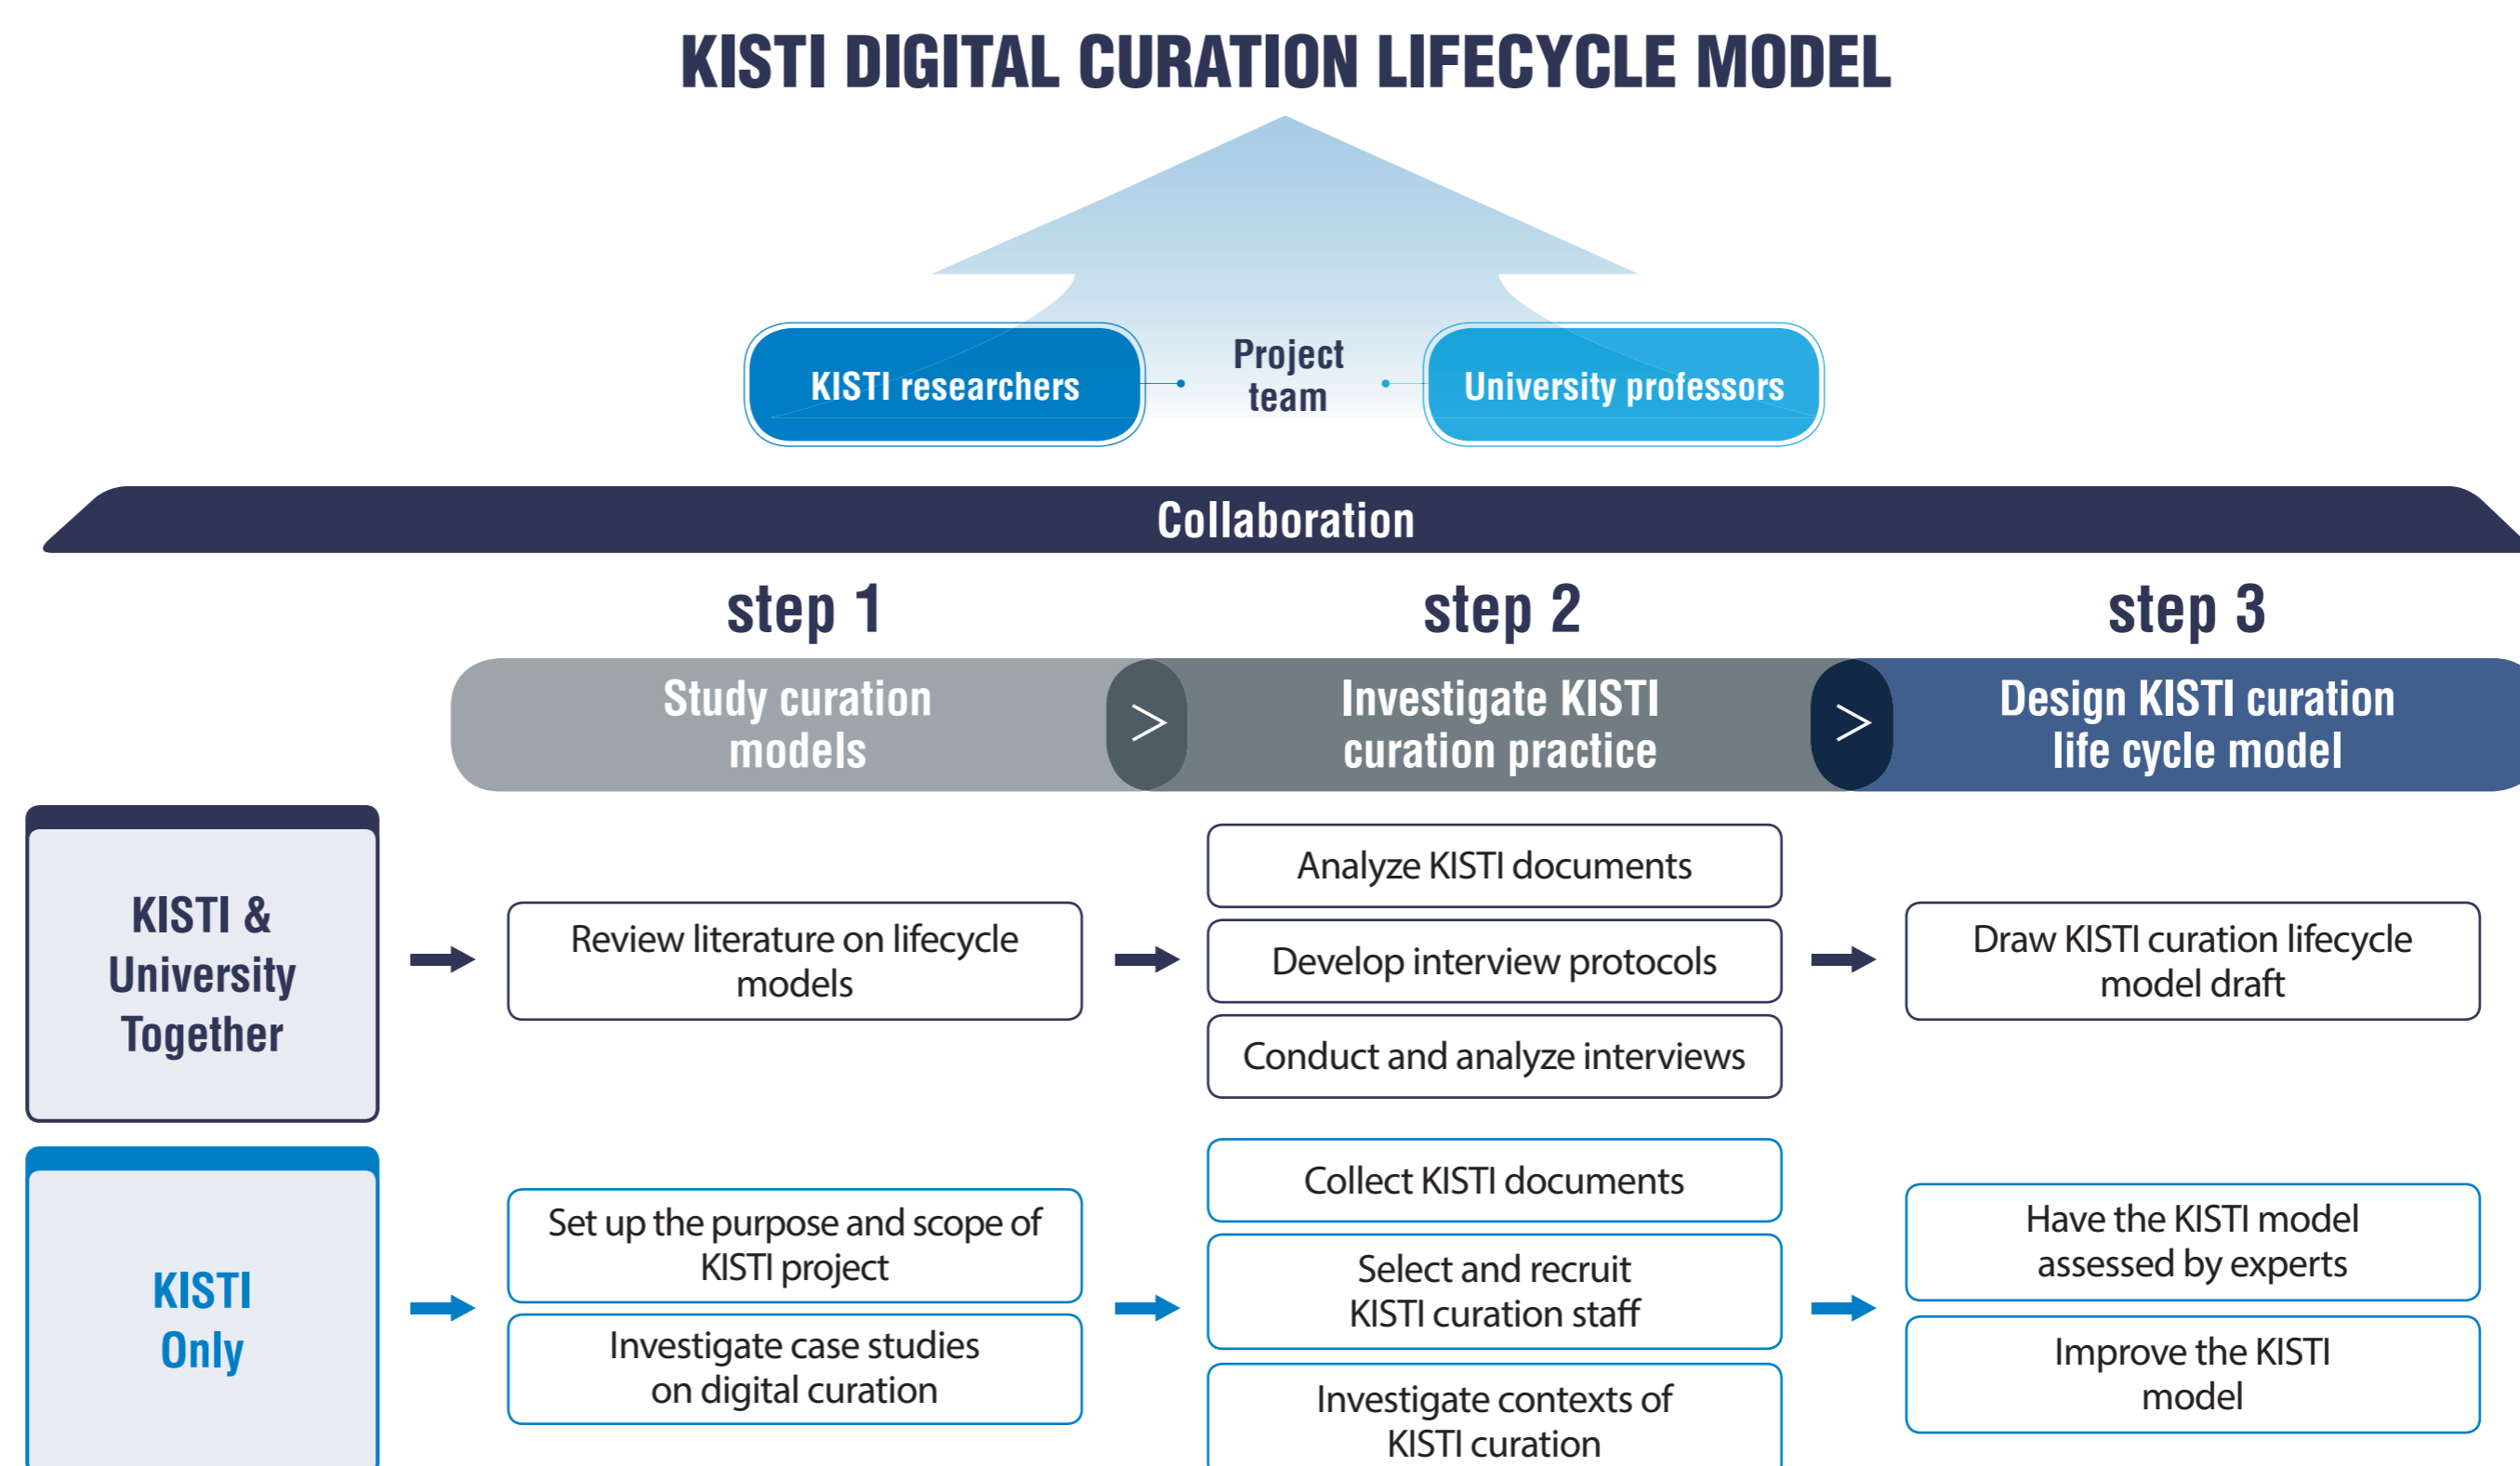

Korea Institute of Science and Technology Information (KISTI)

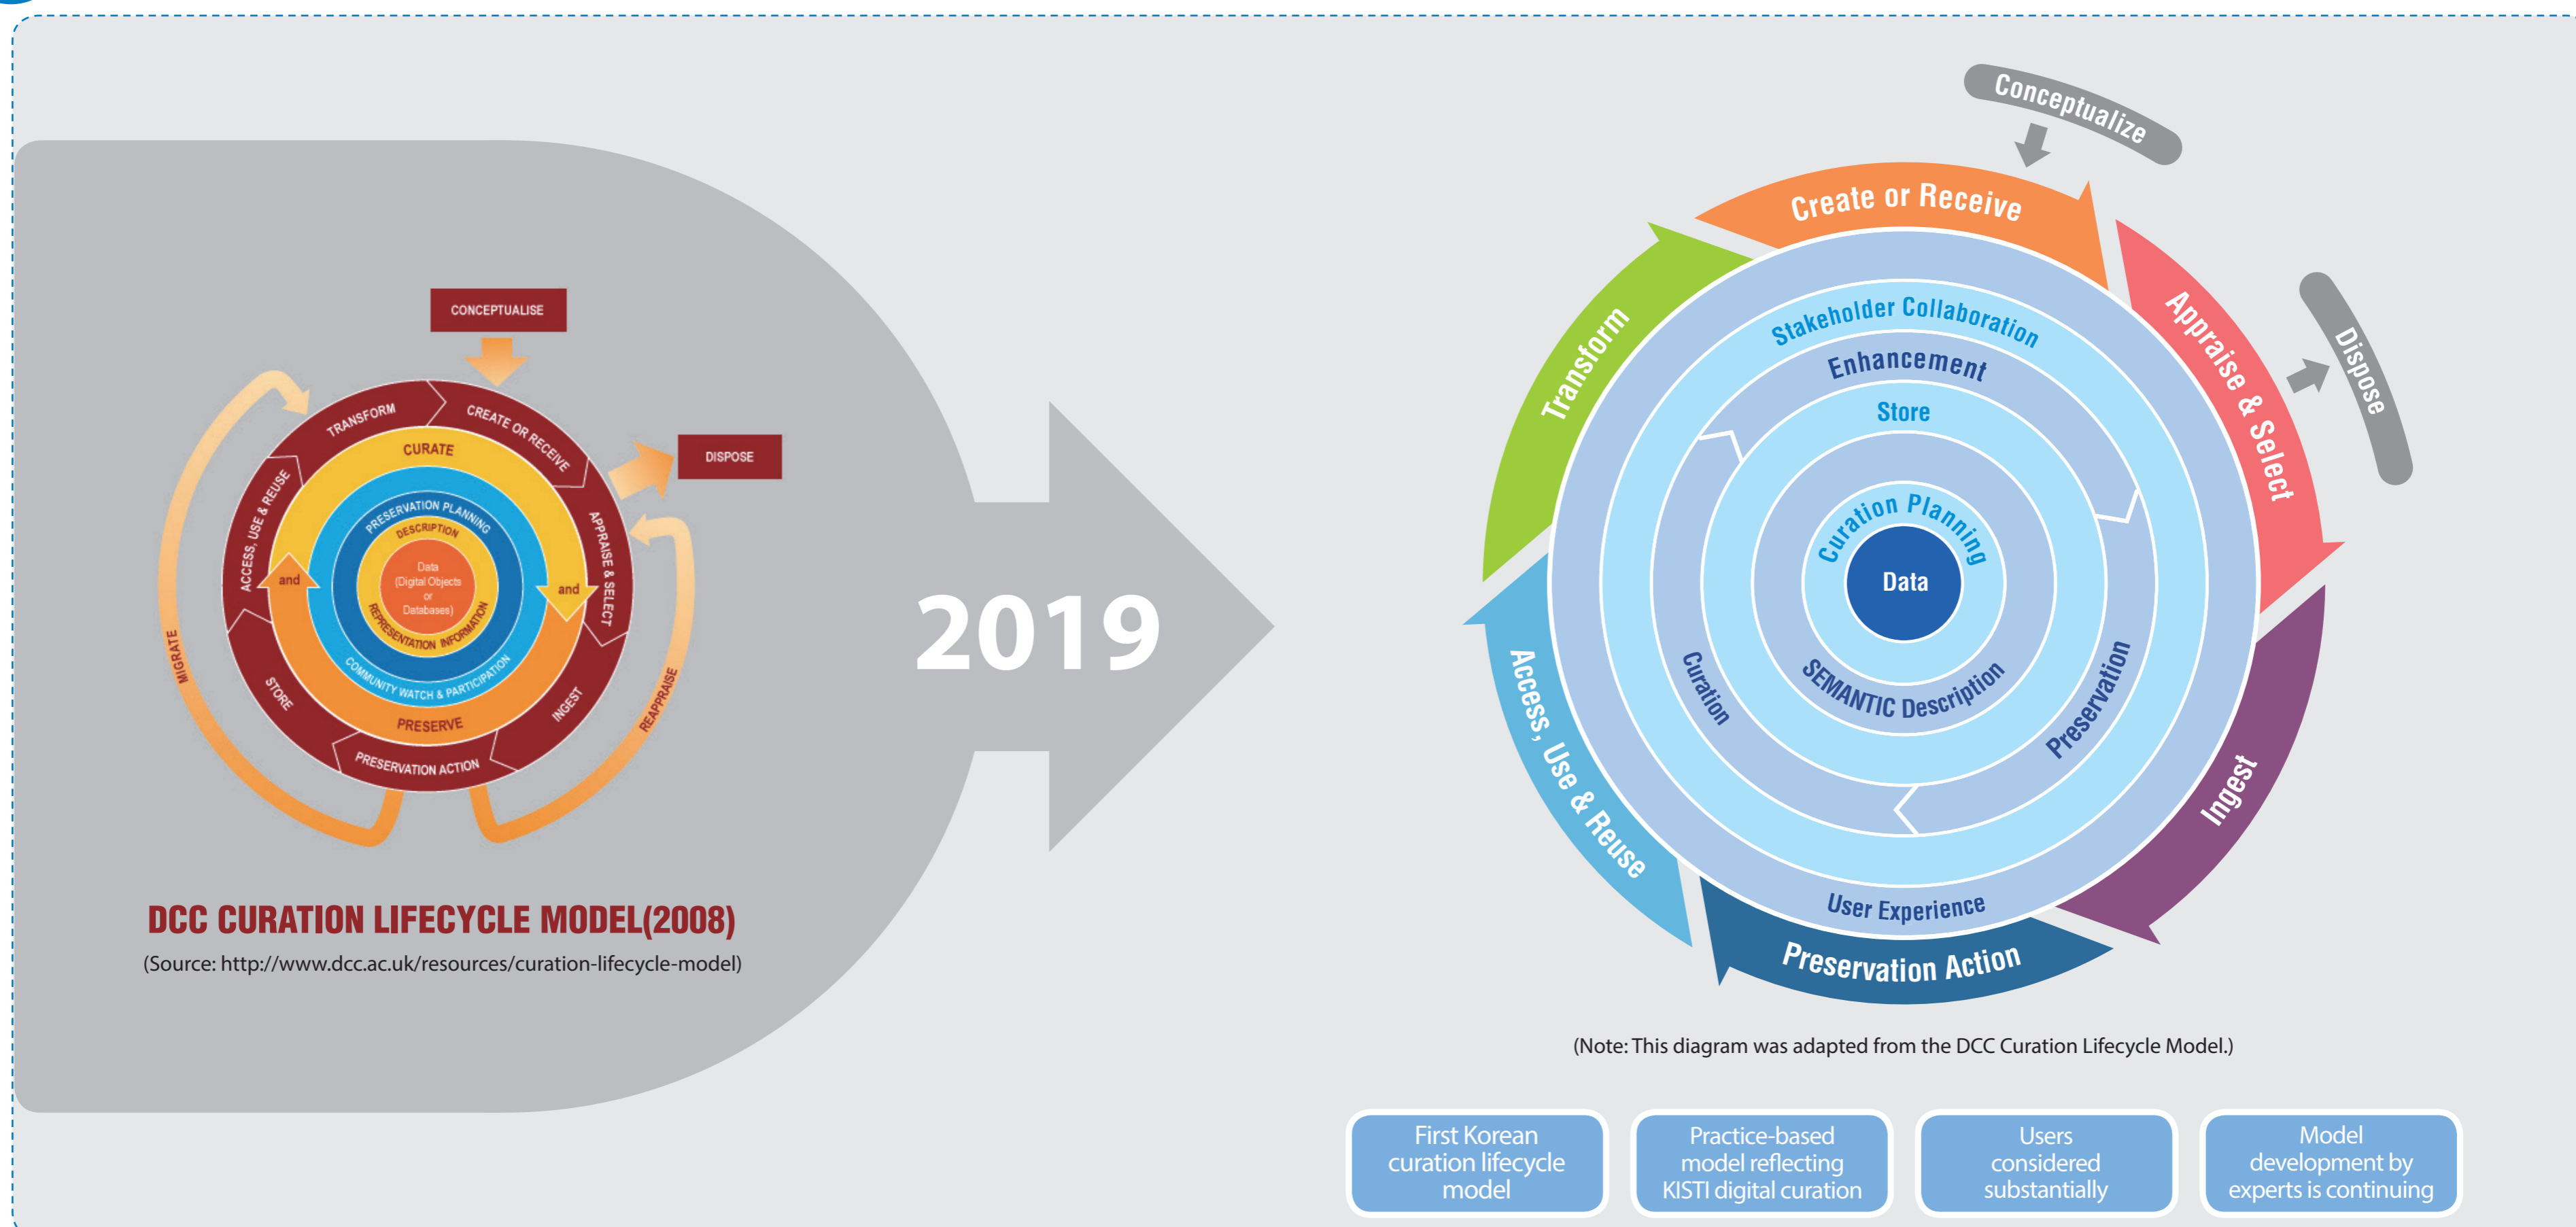

01 ABSTRACT

The Korea Institute of Science and Technology Information (KISTI) is a government-funded research institute and an information service provider. Recently KISTI has developed a digital curation lifecycle model to enhance curation practices and organize a well-coordinated, institutional curation program. The project team completed a draft of the KISTI digital curation lifecycle model by adapting the Digital Curation Centre (DCC) curation lifecycle model. KISTI continues to improve the draft model by consulting with experts.

02 PROJECT TEAM AND COLLABORATION

03 KISTI DIGITAL CURATION LIFECYCLE MODEL

04 ACKNOWLEDGEMENTS

This research was funded by KISTI. I appreciate the collaboration of Haekyoung Hang, Haewon Lee, Jiyoung Park and Soyoung Yoon.

05 FURTHER INFORMATION

I welcome public consultation to improve the KISTI digital curation lifecycle model. If you have any opinions or comments about the model, please contact me via email: rhee.healim@kisti.re.kr
