## Objectives

- To describe the emerging trends and challenges associated with research data management and their potential impact on higher education institutions.
- To examine case studies at both disciplinary and institutional levels, highlighting different models, approaches and working practice.
- To understand the role of the Digital Curation Centre in supporting research data management.
- To gain an overview of the portfolio of DCC resources, tools and services.
- To facilitate networking and the exchange of skills and experience.
- To provide a brief introduction to the DCC Roadshows.

## Format

The Day 1 Workshop will include a mix of presentations and discussion and allow time for networking and collaboration.
