

# Brian McIlwrath & David Giaretta. DCC/STFC Rutherford Appleton Laboratory, UK

## OAIS Representation Information Registry/Repository

The screenshot shows the STFC DCC RoRI GUI Tool. The interface includes a menu bar with options like Label, ReplInfo, View ReplInfo, Save to RegRep, and Clear current. The main window is divided into several sections:

- RoRI Classifications from Registry Server:** A tree view showing categories like RepresentationInformation, Other, Semantic, and Structure.
- ReplInfo search limiters:** A section for searching by Name and Description, with a wildcard character (%).
- Current ReplInfo Object:** A section displaying the details of the current ReplInfo object, including its Name, Description, and CPID.
- Current Registry Label:** A section displaying the details of the current Registry Label, including its Name, Description, and CPID.
- Visual representation of Label:** A section showing the XML structure of the label, including elements like <representationinformation>, <structure>, <formats>, <specification>, <cpid>, <description>, and <value>.
