

## Archive and Data Management Training Center

Our center ensures excellence in creation, management and long-term preservation of data for multipurpose re-use. We help researchers and archives realize the full value of investment in research.

**We train  
and  
consult**

### Activities

We offer training workshops and consulting on data management and archiving topics:

- **data management planning**
- **data sharing**
- **best practice** on consent for re-use, copyright and use of existing data, confidentiality and anonymization, documentation and data enhancement, methods of data sharing, file formats, physical and digital storage
- **long-term archiving and preservation**, data dissemination and security, licensing data for use, managing access systems, format migration and verification

### Our audiences

- **principal investigators** who plan data management and are responsible for oversight
- **Researchers** who implement data management
- **individual researchers** to maximize the utility of data
- **data archivists** responsible for digital curation, enhancement, and long-term preservation
